

## REMARKS

The applicant has amended the specification to correct language errors and typographical errors, to amend the title, and to include a benefit claim. Claims 1-39 and 61-158 have been cancelled without prejudice. All cancellations of claims are to be done without prejudice and are not to be construed as a waiver of any right to file other applications such as continuations, divisions, continuations-in-part, or similar applications and have the remaining claims examined without any reduction in breadth. Applicant requests that claims 40-60 -- each determined in the international stage to satisfy the criteria of PCT Article 33(1)-(4) as to novelty, inventive step and industrial applicability, and each determined to have met the requirement for unity of invention -- be examined as a single group and allowed at the examiner's earliest convenience.

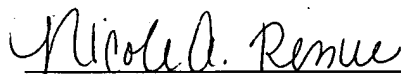

## CONCLUSION

Correction is made by preliminary amendment to the specification and claims. Claims 40-60 are presented for examination.

Dated this 27<sup>th</sup> day of October, 2003.

Respectfully Submitted,

SANTANGELO Law Offices, P.C.
